Development framework integration

Cloudinary integrates with the most popular development frameworks via open-source SDKs. Take a look at the sample code below to see how you can use your development framework to upload an image and then deliver it with an on-the-fly transformation applied.

Sample upload code

railsphpnodeodjangojQueryReactJSFlutterJavaKotlinScalaiOSAndroid

cloudinary.uploader().upload("sample.jpg", ObjectUtils.asMap("transformation", new Transformation().crop("limit").tags("samples").width(3000).height(2000)));

Sample image manipulation tag

railsphpnodeodjangojQueryReactJSFlutterJavaKotlinScalaiOSAndroid

cloudinary.url().transformation(new Transformation().crop("fill").gravity("faces").width(300).height(200)).format("jpg").imageTag("sample");
